MODEL D-10

PHILCO RECORD CHANGER AND CHANGER BASE

Philco Automatic Record Changer Model D-10 is designed for long years of smooth, quiet, and efficient automatic playing of records.

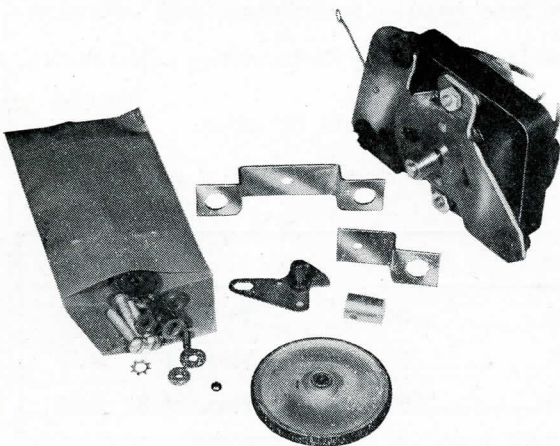

Used in several 1946 Philco radio-phonograph combinations, the Model D-10 is easily installed for operation with any radio. It can be mounted directly on a baseboard or on a steel-frame stand.

The changer operates on 117 volts, 60 cycles, and will play either ten 12" records or twelve 10" records by automatic or manual operation.

The offset pickup arm with permanent needle assures perfect tracking and fine tone. Supplied complete with instructions.

PART NO. 45-9521	Model D-10 Changer	LIST PRICE	\$44.45
PART NO. 76-3932	Changer Base	LIST PRICE	\$5.50

PHILCO MOTOR KITS

Philco motor kits are designed for replacement of the prime-mover units in 1941 and 1942 Philco record changers.

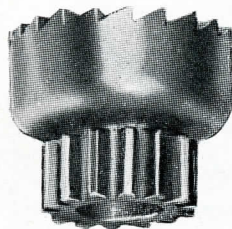

Kit Part No. 45-1549 replaces the 1941 changer motor 318-2802.

Kit 45-1548, which is illustrated, consists of the motor and parts for converting from variable-speed bell-drive to single-speed rim-drive, for improved changer performance. The kit replaces the 1942 changer motor 35-1275.

Supplied with layout template and complete instructions.

PART NO.	DESCRIPTION	LIST PRICE
45-1549	Motor kit (for 1941 changers)	\$11.50
45-1548	Motor kit (for 1942 changers)	\$15.00

PHILCO CLUTCH GEAR

The Philco clutch gear is designed as a replacement for the unit in 1942 Philco record changers. Accurately machined and polished, this new clutch gear is made of treated brass, to give much longer and more satisfactory service than the original bakelite part.

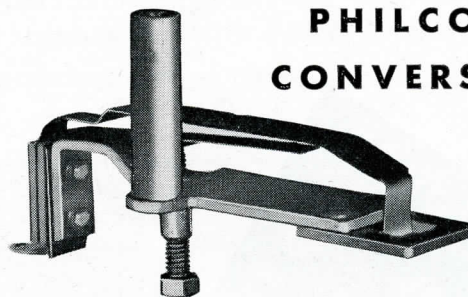

PART NO. 45-6388	LIST PRICE \$4.50
---------------------	----------------------

ADAPTER KIT FOR M15 CONTROL UNIT

For adapting the Philco M15 Control Unit for use with any radio. Consists of necessary parts and complete instructions.

PART NO. 45-1594	LIST PRICE \$2.00
---------------------	----------------------

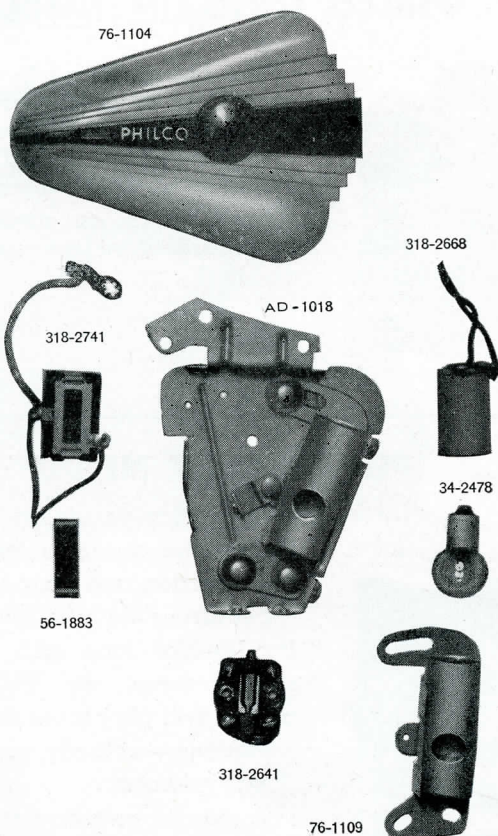

PHILCO TRIP- CONVERSION KIT

The Philco trip-conversion kit contains all parts necessary to convert the velocity-type trip-contact assembly on 1942, Model M51 changers, to the new, improved type of trip-contact assembly used on Philco Automatic Record Changer Model M-4.

Complete instructions supplied with each kit.

PART NO. 45-1565	LIST PRICE \$3.25
---------------------	----------------------

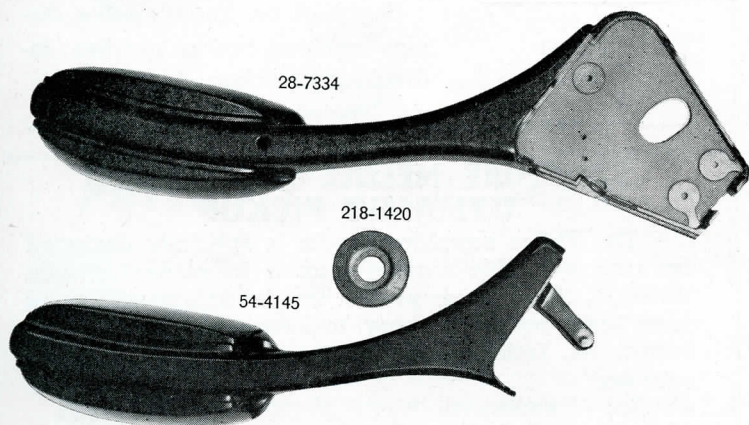

PHILCO LIGHT-BEAM REPRODUCER PARTS

The original fine performance of Philco light-beam reproducers may be restored by these replacement parts, which are exact duplicates of original components. These parts are correct replacements for units in the light-beam assembly using the early zinc tone-arm shell and the later aluminum and bakelite tone-arm shells.

Additional information on replacement tone-arm shells and complete light-beam reproducers is given below.

The photo-cell assembly (Part No. 318-2741) illustrated is for use with the bakelite type of tone arm only. When the aluminum shell is used to replace a zinc shell, the old photo-cell housing should be retained.

PART No.	DESCRIPTION	LIST PRICE
AD-1018	Tone-arm head	\$2.25
34-2478	Light-beam lamp45
56-1883	Photo-cell element	3.00
76-1104	Cover, tone-arm head75
318-2641	Jewel assembly	5.25
318-2668	Lamp-socket assembly	1.00
318-2741	Photo-cell assembly	4.50

PHILCO LIGHT-BEAM REPLACEMENT TONE-ARM SHELLS

Philco zinc tone-arm shells are replaced with the aluminum shell (Part No. 28-7334), shown at the left, and bakelite tone-arm shells are replaced with Part No. 54-4145. Both the aluminum and bakelite shells are finished in beautiful brown hammertone.

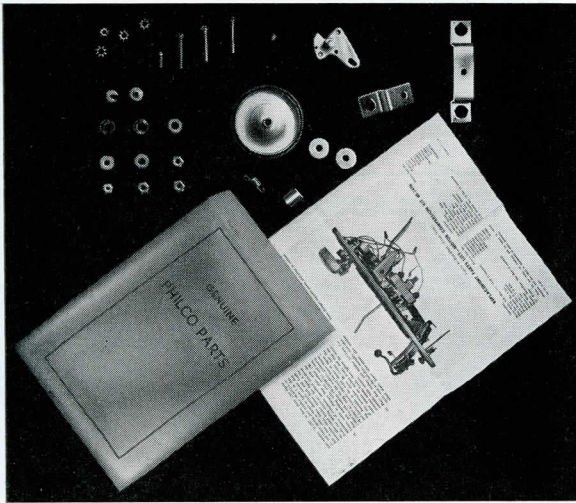

PART No.	TYPE	LIST PRICE
28-7334	Tone-arm shell, aluminum	\$1.50
54-4145	Tone-arm shell, bakelite	1.00

COMPLETE REPLACEMENT LIGHT-BEAM REPRODUCERS

The group of light beam reproducers listed at the right can be assembled from the available parts which are listed above, provided the hardware from the original tone arm is used.

35-2175	35-2361	35-2540
35-2209	35-2517	35-2601
35-2233	35-2518	
35-2281	35-2519	

PHONO PARTS (Cont.)

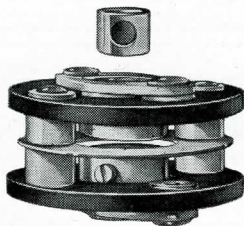

**PHILCO
 PHONOGRAPH MOTOR
 CONVERSION KIT**

Converts 1942 Philco record changers with variable-speed drive to single-speed rim drive. Recommended where only single speed operation is desired for improved changer performance.

Kit includes all parts and hardware necessary for conversion, together with complete instructions.

PART No. 45-1496 LIST PRICE \$2.50

**Universal
 Phonograph Motor Coupling**

Fits 1940 and 1941 PHILCO standard record changers and many other makes; completely re-designed and constructed of rust-proofed steel with Neoprene flexible members. Much longer life than old design.

PART No. 35-2220 LIST PRICE — \$1.75
 Replaces old Parts Numbers 35-2220-1 and 35-2270.

PHILCO METAL CUTTER

Cuts steel, brass, aluminum, plastics, plywood up to .040" thick. Cuts straight lines, circles or compound curves. Clean Edge, no filing necessary.

For cuts inside edges of panel, drill one 1/4" pilot hole to start. Tool steel blade, tungsten carbide shear blocks. Perfect for Philco rear seat speaker installation.

PART NO.	LIST PRICE
45-9525 Metal Cutter	\$15.95
45-9526 Blade	1.00
